

DETROIT FINTECH CHALLENGE

A competition for startups and entrepreneurs

April 6 & 7
2018

Techtown Detroit
440 Burroughs St
Detroit, MI 48202

The Detroit Fintech Challenge is a competition that unites key players in the Fintech ecosystem to generate enduring solutions to the biggest challenges and major concerns in the financial, payments, banking, and insurance sectors. Through the Fintech Challenge pitch competition, early-stage companies will be given a theme/ challenge statement category. Finalists from each "challenge statement category" will be asked to present their concept as a part of the Fintech Challenge Pitch Competition during the Detroit Fintech Challenge weekend.

The Detroit Fintech Challenge aims to make an economic impact in Michigan by creating companies in the financial and blockchain industry. The goal is to create a community of entrepreneurs and developers working on REAL problems and creating REAL modular solutions that can eventually be monetized. We want the Detroit Fintech Challenge to serve as a catalyst to drive a community in Detroit around Fintech Technologies, and engage all the stakeholders in this space.
